New touch screen display. New dash monitor mount.

New freedom of mobility.

Introducing the Havis Touch Screen Display and Vehicle-Specific Dash Mounts

TAP INTO A NEW LEVEL OF MOBILE FLEXIBILITY.

The latest mobile office solution from Havis features a new lightweight, high-resolution touch screen display and optional vehicle-specific dash mounts designed to improve productivity in a mobile office. The new space-saving display functions as an external monitor that mounts close to the dash, providing the option to dock and mount computing devices in the trunk or elsewhere in the vehicle to maximize space and create a comfortable work environment in the cabin.

Touch. Tilt. Swivel. Stow.

- New display provides the convenience of touch-screen navigation and space savings. Features include a red monochrome night mode and easy back-and-forth toggle for maximum visibility in all environments.
- New Vehicle Specific Dash Mounts incorporate a unique friction-based hinge with a tilt/swivel motion for a range of adjustments to help drivers and passengers maintain optimum posture, minimize eye and body strain, reduce glare and access the OEM control panel.
- Compact mount design optimizes space for additional equipment and peripherals to be mounted in the cabin, including the new Havis Rugged Keyboard and patent-pending mount featuring red monochrome illumination backlight and quick release functionality.

*Mount your
computer
remotely.*
