

FX SERIES LIGHTS BULB REPLACEMENT

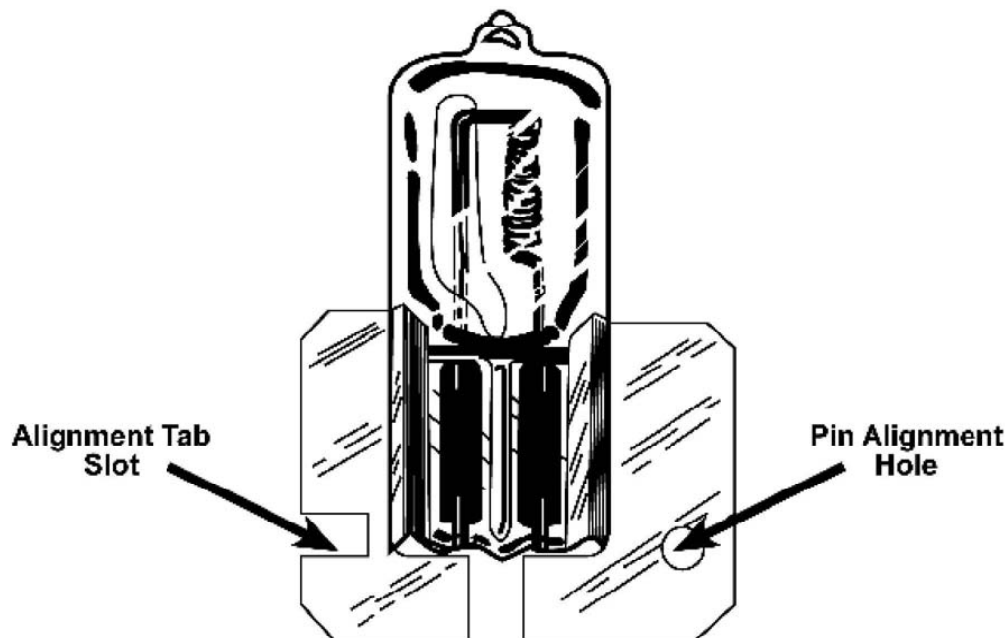

IMPORTANT: Body oil can cause a quartz halogen bulb to overheat and burn out. Handle new bulbs with a clean cloth or wipe clean after touching.

Bulb is held firmly in place by a pin on one side and a tab on the other side of the bulb base. To remove SPOT bulb (Front), hold bulb mount in hand with spring clips facing you. Gently lift right spring clip and pop bulb base from tab. Then gently lift spring clip and pop bulb case clear of pin.

To install a new bulb, simply reverse process.

To replace FLOOD bulb (rear), grasp base of rear bulb mount in one hand and front half (SPOT mount) of bulb mount in other hand. Firmly pull two halves of bulb mount apart and replace FLOOD bulb (55 watt maximum) in the same manner described for SPOT bulb replacement. Then align pins and snap bulb mount assembly back together.

Spare bulbs are available from Collins Dynamics ® distributors located nationwide. Please call Havis, Inc. at 800.524.9900 for a distributor near you. For additional information visit our website at www.havis.com.

Warranty: All parts and labor, excluding bulbs and batteries, are warranted for one full year from date of purchase. No other warranty is expressed or implied.
