

Havis' Guide to Selecting a Trunk Mount

Presented by Havis, Inc, an ISO 9001:2008 certified company that manufactures in-vehicle mobile office solutions for public safety, public works, government agencies and mobile professionals. For over 80 years, the Havis mission has been to increase mobile worker productivity with industry-leading products that are built to the highest safety and quality standards and are designed with comfort in mind.

With the right trunk mount, you can optimize storage space and provide a clean, safe and secure mounting surface for expensive radio/communications equipment. Havis offers different trunk configurations to best suit your needs for trunk space and equipment mounting.

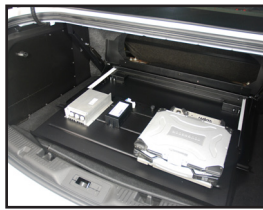

What exactly IS a Trunk Mount?

A trunk mount is a platform mounted in the rear/trunk of a vehicle to mount radio and communications equipment, computers, power supplies and more. They are designed to reduce clutter and not to interfere with the OEM spare tire, and can be safely slid or folded away when not in use.

Basic Trunk Mount Choices

Slide Out Trays

Fold Down Heavy Duty Trays

Fold Down Side Mounts

Universal Storage Box

Fold Up Cargo Plate

Slide Out Trays These trunk mounted trays slide out for easy access to equipment. The slide out feature provides easy access to electronics for service. When pushed closed, the tray automatically locks in place, keeping electronics safe from any potential damage. They offer full access to the OEM spare tire.

They are shipped fully assembled and are vehicle specific for easy "no holes drilled" installation. The equipment mounting tray simply removes for bench-top installation of equipment - no more leaning into the trunk for equipment installation. Full width, slide out trays can accommodate any amount of equipment.

Fold Down Heavy Duty Trays These trunk mounts are designed to mount electronics and equipment securely and safely on a convenient hinged platform that easily folds up, keeping equipment protected and freeing up valuable trunk space. This product even allows unrestricted access to the spare tire.

Fold Down Trays mount at the front of the trunk near the seat area and maximizes available trunk storage height. When the trunk tray is hinged up in the closed position, it allows for access to the spare, and all items mounted on the tray will be protected from damage. The slide out tray is removable for pre-installation of equipment.

Fold Down Side Mounts Storage is at a premium in sedan trunks. Havis Fold Down Trunk Side Mounts mount on the fender side of the trunk while still allowing access to the spare tire in Ford Interceptor Sedan and Crown Victoria, Dodge Charger, and Chevrolet Impala. The smaller platform is ideal for mounting just a few pieces of equipment in the trunk. The included locking latch ensures equipment and data security.

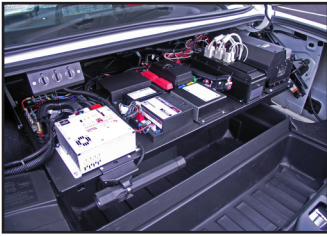

Universal Storage Box For the utility vehicle owners, Havis offers a new product – the Universal Storage Box. While it is a rectangular box that is interchangeable between vehicles, it has many similarities to the Trunk Fold Downs by providing a safe and secure mounting location for mission-critical devices. Equipment mounts to the removable inner door panel for easy bench-top pre-assembly. The universal design allows it to be mounted behind the rear seat, against a partition or K9 transport unit, or any flat surface. Some vehicle specific mount kits are available for no holes drilled installation. Smaller boxes are also available for special applications.

Fold Up Cargo Plate for Ford Interceptor Utility These plates replace the OEM rear cargo floor/spare tire cover and allow equipment to be safely mounted on the underside of the plate for protection. The cargo plate offers 6" of mounting height from the top of the spare tire to the bottom of the plate.

Choosing the right trunk mount for you

All of Havis' trunk trays are constructed of 14-gauge black powder coated steel for strength and durability. A full line of accessories such as equipment guards, second tier shelf and accessory slides are available to help complete the total solution.

See the previous page for more information on all of Havis' trunk mounts and each of their specific features.

Features by Trunk Mount Model

	No Holes Drilled Installation	Different Widths Available	Spare Tire Access	How to Open	Mounting Weight Capacity	Removable tray for bench top installation
Slide Out Trays	Yes	Yes, half and full	Yes	Slide	100 lbs	Yes
Fold Down Trays	Yes	No	Yes	Hinge Down	60 lbs	Yes
Fold Down Side Mount	Yes	No	Yes	Hinge Down	30 lbs	Yes
Universal Storage Box	May be required in some vehicles	No	Yes	Hinge Down	150 lbs	Yes
Fold Up Cargo Plate for Ford Interceptor Utility	Yes	No	Yes	Hinge Up	100 lbs equip mounting, 400 lbs on top of plate	No

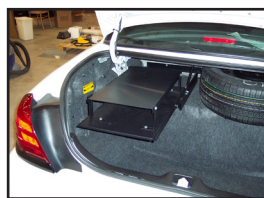

Consider Accessories and Options

Some options to add to your trunk mounted storage include:

- **Equipment Guards** to help protect equipment on the tray from other objects in the trunk
- **Second Tier Shelf Assembly** (available in 12" and 24" long) to add even more equipment to your trunk mount
- **Storage Box Assembly** with lock to secure important items in the trunk
- **Upper Cage Option** for Universal Storage Boxes mounted in a Ford Interceptor Utility
