Always!

➢ Read all instructions before installing any Havis, Inc. products.
➢ Check for obstructions (Wires, brake lines, fuel tank, etc.) before drilling any holes!
➢ Use hardware provided with install kit
Front partition assembly

Passenger upper filler

Driver upper filler

Top mounting plate

Lower side fillers

Front support brackets

Front of Vehicle
Slide front passenger seat forward and remove cover under seat. Drill out the existing outboard hole in seat base to 1/4”.
Repeat process on front driver’s side seat base.

NOTE: If vehicle has OEM plastic clips that hold rear trim panel to these holes, clips and trim must be permanently removed.

Attach front lower support brackets (CM007238) to pre-drilled holes in seat base using 1/4”x 3/4” hex bolts, 1/4” washers, and nuts. (one each side)

Slide partition in through the side door and prop into position. Attach to the front lower support brackets using two (2) 1/4”x 3/4” carriage bolts and 1/4” nuts.

Temporarily removing hatch will make install easier.

Remove push pins from headliner and line up mounting plate to the holes. Reinstall push pins to align the plate to the rib. Pre-drill 1/8” holes and install with #10 flat head sheet metal screws.

Do not overtighten screws!!
Remove OEM grab handle from passenger side “B” pillar.
Repeat process for driver’s side.
Attach the upper clear polycarbonate side fillers to partition frame using 1/4"x 3/4" bolts, washers and nuts.

Install additional clear polycarbonate wings using 1/4"x 3/4” carriage bolts, washers, and nylock nuts.

It may be necessary to hold the carriage bolts with pliers while tightening until fully seated in the polycarbonate.

Attach lower side fillers with 1/4"x 3/4” carriage bolts, washers and nylock nuts.
Repeat process for driver’s side.

Installation is now complete.
