

ONE (1) PIECE EQUIPMENT BRACKET ORDERING INFORMATION

Havis Equipment Brackets secure a wide range of control heads into our consoles. If you cannot find a listing of a specific control head, look at the universal 2 piece equipment brackets for a solution. To find a two piece bracket, you will need the width and height of your equipment. See web site link to determine bracket set needed. http://www.havis.com/catalog/Equipment_Bracket_Crossover_Chart-789-1.html

If a customer desires a one piece (1P) equipment bracket, please contact a Havis Sales Representative to see if we can help. Not all brackets requests will be granted due to quantity and popularity of control head. If a one piece (1P) bracket request is approved, a loaner / sample control head must be shipped to:

Havis, Inc.
75 Jacksonville Road, Warminster, PA 18974
Attn: Engineering Department

**** This form must be filled out and included with the shipment of the loaner control head ****

Account / Customer Name: _____ Account No: _____

Contact: _____

Return Ship to Address: _____

City: _____ State: _____ Zip Code: _____

Phone Number: _____
