

All New Mobile Office Solutions for the 2013 Ford Interceptor Utility

Industry-Leading Products for the New Interceptor

Maximize your mobile workspace with intuitive mounting and computing solutions from Havis. We strive to engineer products that make performing tasks during long shifts easier and more comfortable. Havis now offers two all new equipment consoles, including a low-profile option, that allows for safer mounting of controls and accessories while providing a perfect mounting location for computer solutions.

Equipment Mounting to Fit Your Needs

Havis offers two custom-fit consoles designed specifically for the new 2013 Ford Interceptor Utility that replace the OEM console without permanent vehicle modification. These options better serve your specific needs, and offer double the internal mounting space than competitive products. Providing space for mission critical controls while achieving OEM-level quality, fit and finish, Havis stands behind its products and proves it with a lifetime warranty.

- **Vehicle Specific 14" Console (C-VS-1400-INUT)**

This new low profile console was specifically designed for the 2013 Interceptor Utility. This console is a perfect solution for an application with smaller remote-control heads and less equipment. Allows full access to OEM dash controls, USB ports and power outlets.

- **Vehicle Specific 21" Console (C-VS-1308-INUT)**

The Standard console allows for larger equipment control heads to be mounted inside the console without protruding and becoming a safety hazard. Allow full access to OEM dash controls, USB ports and power outlets.

- **Vehicle Specific Dash Monitor Mount (C-DMM-123)**

This space saving solution positions your computer monitor in a safe, convenient line of sight which allows additional equipment to be mounted in the console. Spring latch easily secures monitor when pushed into closed position, and opens easily for access to OEM dash controls.
