23047
Speaker grill

Main Console Housing

Note:

Newer style plastic speaker grills snap into the large holes in the side of console. Grill mount hardware is only required if attaching speaker on the inside of grill.

Hardware not provided.

Recommended Hardware:
(4x) #8 Keps nuts, (4x) 8-32
x 3/4" screws

View of OEM interior prior to installation of C-VS-1014-RAM console.

Remove center seat and front accessory pocket. Leave OEM center seat brackets in vehicle.

Attach cover plate on passenger side of console with supplied Torx screws. This can be done after console is installed, but passenger seat would need to be removed for hardware access.

Carefully place console housing into vehicle on top of OEM center seat brackets.

****Be careful not to damage OEM plugs and harnesses on transmission hump****

Position console up against lower center dash

Attach console floor brackets to OEM seat brackets with 5/16-18 x 3/4" Hex bolts, flat washers, lock washers and nuts.

Optional C-HDM-214 pole can be installed at this time using the existing 1/4" x 3/4" carriage bolts in the side of console. Remove round knockout in pole face plate and attach plate to console around pole.

Console housing installed and ready to complete wiring, control head, and accessory installation. Slide 1/4-20 hex nuts (provided) into side extrusions as needed for side mounted accessories
